

# Denver Heat Pump Rebate Overview

EEBC Quarterly Meeting | Dec 14, 2023

# Heat Pump Equipment Rebate Overview

Available for existing Commercial, Multifamily and Small Residential buildings with heating, cooling or hot water systems.

Standard rebates are designed to cover the cost difference between gas-fired systems and electric heat pumps.

All Denver rebates require pre-approval prior to equipment installation.

Check out full program rules and process at [DenverGov.org/HeatPumpRebates](https://denvergov.org/HeatPumpRebates)

# 2023 Year-in-Review

- Updated rebate process and portal for Residential Rebates
- Implemented a pre-approval/reservation process for Residential Rebates and online budget tracker to improve confidence in rebate availability
- Launched Commercial/Multifamily Heat Pump Equipment Rebates for existing buildings - HP RTUs, ASHPs, mini-splits and HPWHs
  - \*Stackable with Xcel Energy's recently launched commercial heat pump equipment rebates

# Looking forward to 2024

- No changes to rebated measures or equipment eligibility for heat pump equipment rebates on Jan 1, 2024
- Continuing coordination with Xcel Energy across all programs and measures
- Working on additional assistance, trainings and incremental improvements to processes
- Launching additional Commercial/Multifamily equipment rebates beyond just HP RTUs, ASHPs, mini-splits and HPWHs

---

# Resources & Contact Information

# Home Energy Rebate Program Resources

## Resources:

- Instructions for installers applying for rebates
- How to use the installer portal
- Program and rebate measure details and requirements, including program eligibility
- Rebate measure summary

[www.denvergov.org/CAREContractorResources](http://www.denvergov.org/CAREContractorResources)

## Resources for Contractors

As a contractor, you are the homeowner's connection to Denver's Home Energy Rebates, since you will be the one receiving the rebate from the city and applying it to the customer's bill.

## Instructions for Installers Applying for Rebates

All rebates offered through Denver's Home Energy Rebate Program must be point-of-sale rebates to customers. Rebates must be shown as a rebate or credit to the customer's signed agreement in order to qualify.

You may reserve rebates before the project is complete with a signed customer agreement.

# Building Electrification Program Resources

## Resources:

- Rebates for Equipment for those ready to electrify
- Rebates for Electrification Feasibility Reports for those still not sure
- Rebates for Electrification pilots for those who do not see their equipment in the rebates
- Contractor trainings and information on permitting heat pumps
- Information on heat pumps

[www.denvergov.org/BuildingElectrification](http://www.denvergov.org/BuildingElectrification)

### Planning for Equipment Replacement

Find resources to help you (1) decide if a heat pump is right for your building before your system fails and (2) prepare to permit and install a heat pump instead of a gas system.

### Building Electrification Rebates

There is money to help you replace your aging gas-fired heating and cooling systems with efficient electric alternatives! Learn about our different rebate programs and which ones might be the right fit for you and your building.

### Resources for Contractors

Contractors and service providers go here! Find trainings, information, and other resources that will help you navigate the Energize Denver Electrification Program and Electrification Feasibility Reports.

### Why Electrify?

Shifting to electric equipment like heat pumps has many benefits. Learn more about why Denver is making the shift to all-electric buildings and read our Renewable Heating and Cooling Plan.

### Equipment Replacement Code Changes in 2023, 2025, and 2027

Energize Denver requires electrification for space and water heating equipment upon equipment replacement. This will happen through a series of updates to the Denver Building Code. Learn more about what to expect.

### Resources for New Construction and Major Renovations

When you are planning a major renovation in your building, you will be subject to updates to the Denver Building and Fire Code. Read more about the code and what you need to do to be in compliance.
